

SMARTER TOGETHER IN VIENNA, MUNICH AND LYON

„Vienna has been awarded with the European funding project 'Smarter Together' - together with the partner cities of Munich and Lyon. Until 2021, 7 Million Euro of EU-funding will be invested in the urban quarters of Geiselberg / Enkplatz / Brauhuberviertel in the district of Simmering which will generate an overall investment of over 46 Million Euros. Our goal: To shape an innovative and environmental friendly district of Simmering and a City of Vienna with a high quality of life. We will reach this through future oriented Smart City Solutions which will be developed jointly by all partners together with the citizens living there.“

Michael Ludwig
Executive City Councillor for Housing, Housing
Development and Urban Renewal

ABOUT SMARTER TOGETHER

70 experts develop 41 projects for the district of Simmering such as the 0-energy gym: This is Smarter Together.

Whether small or big, young or old – all inhabitants of the district of Simmering are part of Smarter Together. One of the biggest players in the district is Siemens: With 1.200 staff members it is the biggest employer locally and partner of Smarter Together. For the young citizens big investments will be made in the New Secondary Schools “NMS Enkplatz”: Brand new zero-energy gyms and modern urban furniture. The refurbishment of vast residential buildings will bring advantages for all: Reduced heating costs for the tenants and know how for the future.

This way, all will have a benefit = Smarter Together in Simmering.

Funded by the Horizon 2020 programme
of the European Union

© PID / Jobst

„Smarter Together“ is a project for smart urban renewal. It is funded by the EU and implemented in Vienna, Munich and Lyon. All partners, institutions, governance, enterprises and the local inhabitants jointly develop ideas and projects which will bring more quality of life into the district. The focus lies on (social) “housing”, “mobility” and “energy”.

Experiences and results from Vienna within the project are shared within the City administration and other districts as well as internationally. The EU funded project includes also other follower and observer cities such as Santiago de Compostela, Sofia, Venice, Kiev/Kyiv and Yokohama .

Project duration: 2016 to 2021

LET'S MAKE SIMMERING FIT FOR THE FUTURE!

A PROJECT FOR A WHOLE DISTRICT.

The local inhabitants of the traditional district of Simmering as well as the City of Vienna, numerous partners and enterprises develop joint actions for an urban district with a high quality of life.

SMARTER TOGETHER in the District of Simmering.

FACTS AND FIGURES:

- Three residential neighborhoods with 1.300 inhabitants will get a smart refurbishment. This corresponds to a **total floor surface of 63.000 m²**.
- **6.000.000 kilowatt hours (kWh)** will be saved every year (in all the refurbished housing complexes together). This corresponds to the energy use of about 700 housing units.
- **9.000.000 kWh** provided by renewable energy sources (thermic as well as electric energy) guarantee a more sustainable and future-oriented energy supply. Considerable savings for the tenants in energy and heating costs.
- Total saving of about **550 ton of carbon dioxide (CO₂)**.
- **900 jobs** will be secured or partly even created.
- **9 departments** of the Vienna city administration are included in the intensive governance learning process. Experiences and results of the project will be integrated in a sustainable way all over the city.

CREATE TOGETHER. Focus Participation

- **INFORMATION:** Ask the team of the urban renewal office GB*3/11 in the "SIMmobile" (the Info-Mobile of Smarter Together), visit the website or subscribe to the newsletter.
- **PARTICIPATION:** Pupils of the New Secondary Schools „NMS Enkplatz“ have workshops on Smart City issues. A mobility survey in the district has been made and numerous participatory activities are ongoing.
- **CO-DESIGN:** Tenants participate in the refurbishment projects.
- **COUNSELING:** Free of charge counseling by the GB*3/11 on Smarter-Together activities as well as on rents, operating costs, green spaces etc.

ADVANCE TOGETHER. Focus on traffic and mobility

- **MOBILE:** First Mobility Point for new mobility services. www
- **SHARED:** Rent E-Bikes and E-Cars.
- **ECO-FRIENDLY LOGISTICS:** The Post delivers parcels with EVans.
- **QUIET WITH ZERO-EMISSIONS:** E-Forklifts at Siemens.
- **QUALITY OF LIFE:** E-Cargo-Bike for the quarter; walking to school.

LIVING TOGETHER. Focus Refurbishment

EFFICIENT: Thermal-energetic refurbishment of residential neighborhoods.

MODERN: Photovoltaic and solar heat.

LOW COST: Energy saving lighting.

ECO-FRIENDLY: E-cars for housing communities.

FUTURE ORIENTED: New annex building for the secondary schools NMS Enkplatz and zero-energy gyms.

SUPPLYING TOGETHER. Focus Energy

INNOVATIVE: New energy concepts for the Zero-energy gyms and development of district heating.

CLIMATE FRIENDLY: Waste heat and solar energy for 3.000 households.

PRODUCTIVE: Locally produced energy is used to produce district heat.

EFFICIENT: Over 250.000 kWh per year by solar energy.

MODERN: District heating for 250 additional flats.

SIMMERING CENTRAL AREA. Geiselberg / Enkplatz / Braunhuberviertel

Vienna's „Smarter Together“-urban renewal and project area is located between the main road "Simmeringer Hauptstraße" and the Eastern rail track (i.e. the quarters of Geiselberg, Enkplatz, Braunhuberviertel). In total, 21.000 inhabitants will directly benefit from smart solutions in the areas of refurbishment, energy, mobility and Information and communication technology.
