- Science Pool

Inhabitants and businesses in the project area

CITIES AND INTERNATIONAL NETWORK

Partners from Lyon, Munich, Santiago de Compostela, Sofia and Venice as well as additional European entities

Smart and inclusive solutions for a better life in urban districts.

Together with numerous partners, the City of Vienna develops in the district of Simmering future oriented smart and social smart city solutions. Project duration: 2016 to 2021

„Smarter Together“ is a EU lighthouse project within Horizon 2020 program as well as THE Viennese Smart City initiative on urban renewal and lighthouse project in the district of Simmering under the patronage of Executive Municipal Councilor for Women and Housing Kathrin Gaál.

The project sets new standards in the area of holistic urban renewal with a focus on building refurbishment, energy, mobility, infrastructure and digitization. It is based on the partnership-based cooperation of a large number of actors and departments of the City of Vienna as well as the consistent involvement of its citizens. With Smarter Together, over 7 million Euros of EU funding produce an overall volume of investment of some 80 million Euros. Smarter Together is THE “Networks of Excellence” of the City of Vienna that implements future oriented ideas and that inspires numerous actors.

This successful multidisciplinary project is meant to serve as a model for similar projects and invites all to join in and to shape together the city of the future with a high quality of life.
